## ESRP-SCS-UNO1372

### Single open controller with real-time fieldbus control

The provision of IEC-61131-3 languages for cross-platform PLC programming minimizes development time and costs and enables motion control with dual fieldbus EtherCAT and CANOpen for servo drives, servo motors, inverters, and induction motors in various applications.

### Reduced downtime with powerful visualization management

On-site machine operation and systems monitoring with flexible target visualization boosts productivity and overall efficiency, while web-based visualization enables remote operation and diagnostics.

### Diverse database connectivity options for flexible integration

Supporting ODBC functionality, the Edge SRP could simplify database connection. Plus, Machines can be directly connected to the WISE-PaaS cloud, utilizing dashboard function that provides efficiency equipment management, increasing productivity.
