NB-IoT/LTE-M: The Future of Smart City IoT!

About NB-IoT/ LTE-M

NB-IoT and LTE-M are new wireless technologies included in the 5G evolution of cellular technology standards defined by the 3rd Generation Partnership Project (3GPP). NB-IoT and LTE-M feature low power consumption and utilize LTE networks based on licensed spectrum bands. These technologies are optimized for connectivity to machines, assets and sensors in order to enable IoT applications.

Azure

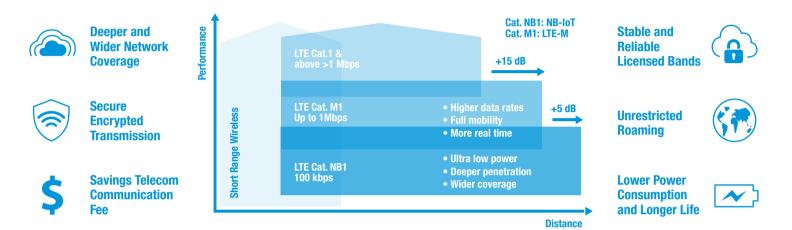

About MQTT, CoAP, and Lightweight M2M

WISE-4471/WISE-4671 follows MQTT's publish and subscribe messaging model which is ideal for low bandwidth, high latency, and data limits. Additionally, as an IoT device, WISE-4471/WISE-4671 also supports lightweight protocols such as CoAP, which are suitable for small devices that are unable to communicate efficiently with limited resources. As MQTT and CoAP are popular standards in the market, the data format can raise concern over messaging protocols. Accordingly, WISE-4471/WISE-4671 also supports the LwM2M protocol which has the management interface built on top of CoAP to enable device management operations. There is also the official publication of OMA LwM2M2 Objects and Resources to alleviate data inter-compatiblity concerns. LwM2M is a protocol offering flexible and scalable device management with improved time to the market; especially for low power devices with constrained processing and storage capabilities.

A Stable Choice for Remote Wireless Transmission

Advantech has created a plug-and-play NB-IoT/LTE-M device-to-cloud solution in cooperation with telecom operators and wireless module suppliers. Using WISE-4471/WISE-4671 series wireless I/O module to integrate with the WISE-PaaS industrial IoT platform and mainstream public cloud services. The solution helps with the development of smart cities by obtaining field site data on widely dispersed facilities through NB-IoT/LTE-M and displaying, and analyzing data on cloud platforms.

Upgrade Legacy Equipment through Cloud Management

WISE-4471/WISE-4671 series NB-IoT/LTE-M wireless I/O module is suitable for data collection from widely distributed stations. No complicated programming, setup, or registration are required for a fast introduction into IoT applications such as smart cities, smart water/electricity meters, and remote facility management.

Smart Meter

- Remote fee calculation
- Remote power cut and restoration
- Load management

Water Treatment

- Pressure and flow monitoring
- Start/stop control
- Water level monitoring

- Pipeline pressure and flow monitoring
- Valve control
- Leakage monitoring

WISE-4671 Series Advanced Industrial Cat. NB1/Cat. M1 Wireless I/O Module

			l	Advanced Industria	I Cat.NB1/Cat.M1 V	Vireless I/O Module		
		Model Name	WISE-4671-UA					
		Standard			3GPP, Release 13			
•		Band	B2,3,4,5,6,12,13,18,20,26,28					
		SIM Туре	Nano SIM/4FF					
		Function	Wireless Board					
		Positioning	GPS / Galileo / BeiDou / GLONASS					
		Power Input	4000 Lithium Rechargeable Battery 10~50Vdc External Power 17~21Vdc Solar Panel					
		Configuration Interface	Micro-B USB					
			IP65 I/O Module					
		Model Name	WISE-S614-A	WISE-S615-A	WISE-S617-A	WISE-S672-A	WISE-S600	
	W W W	Spec	4AI & 4DI	RTD	2AI, 2DI, 1D0 & 1RS-485	6DI, 1RS-485 & 1RS-485/232	Upon Customization Request *MOQ required	

	Accessories		
Part Number	Description		
1654011516-01	M12, A-code, 8 Pin, male		
1655005903-01	M12, A-code, 4 Pin, female		
1700028162-01	M12, A-code, 4 pin, female with 1M cable		
1700028163-01	M12, A-code, 8 Pin, male with 1M cable
